

# Shaik Mohammed Kaif

Software / Test Engineer | Python & Java Developer | AI/ML Graduate (2025)

**Email:** personal.kaif7@gmail.com

**Phone:** +91 93477 49638

**LinkedIn:** linkedin.com/in/kaifshaikMD

**Location:** Kadapa, Andhra Pradesh

---

## Professional Summary

B.Tech graduate (Computer Science Engineering – Artificial Intelligence & Machine Learning) with a strong programming foundation in Java, Python, C/C++ fundamentals, and SQL, built through academic coursework and independent full-stack, ML, and computer vision projects. Comfortable working across the Windows environment, with coursework-level exposure to networking concepts and hands-on experience debugging, verifying, and iteratively testing self-built applications end-to-end. AWS Cloud Practitioner certified. A quick, methodical learner who is comfortable making decisions under uncertainty and is looking to build domain expertise in Distributed Control Systems (DCS) and SCADA product testing.

## Core Skills

- **Programming Languages:** Java, Python, SQL, JavaScript, C/C++ (fundamentals)
- **Scripting:** Python (automation, data pipelines)
- **Testing & Quality:** Manual functional testing, bug identification and reporting, iterative debugging, and feature verification – practiced hands-on while building and shipping personal full-stack and mobile projects
- **Systems & Networking:** Windows OS (daily driver, comfortable with configuration/administration tasks); coursework-level understanding of networking fundamentals (TCP/IP, client-server architecture)
- **Core Concepts:** OOP, Data Structures, Computer System Architecture, Software Development Life Cycle (SDLC)
- **Cloud:** AWS Cloud Practitioner (CLF-C02)
- **Frameworks & Tools:** React.js, React Native, Django, REST APIs, Git, TensorFlow, Keras, Scikit-learn, OpenCV, VS Code
- **Currently Building Toward:** DCS / SCADA fundamentals, virtualization basics, PowerShell scripting

## Project Highlights

- **Online Shopping Mart** – Full-stack web application using Java, Django, React.js, SQL, and REST APIs; independently tested and debugged all core flows.
  - **Personal Wellness Mobile App** – Multi-screen React Native (Expo) app; ran manual test passes across 12+ screens, logging and fixing functional bugs before release.
  - **Cryptocurrency Market Prediction** – Deep learning forecasting system using Python, TensorFlow, LSTM, and RNN; validated model outputs through systematic testing of data pipelines.
  - **Gesture-Controlled Presentation System** – Real-time hand gesture recognition system using OpenCV and Computer Vision.
  - **Government Schemes Web Portal** – Centralized portal developed using Django, HTML, CSS, and JavaScript.
- 

## Education

**Bachelor of Technology (B.Tech)**

**2025**

Computer Science and Engineering (Artificial Intelligence & Machine Learning)

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology, Chennai

---

# Technical Projects

## Online Shopping Mart – Full Stack Web Application

*Java, Django, React.js, SQL, REST APIs*

- Designed and developed a full-stack e-commerce web application.
- Implemented backend business logic and database integration.
- Developed RESTful APIs and user authentication features.
- Manually tested checkout, auth, and API flows; identified, logged, and resolved functional bugs prior to deployment.
- Applied OOP principles to build a scalable and maintainable code architecture.

## Personal Wellness Mobile App

*React Native, Expo, JavaScript, AsyncStorage, Expo AV*

- Built a multi-screen mobile application featuring journaling, daily check-ins, mood tracking, and memories.
- Ran structured manual test passes across 12+ screens (WelcomeScreen, JournalScreen, BirthdayScreen, MusicScreen, and others), tracking bugs and verifying fixes across iterations.
- Implemented a fully functional music player with playback controls using Expo AV.
- Integrated AsyncStorage for persistent local data storage across sessions.
- Designed themed persona screens (Soul, Nature, Magic, ForYou, Explore) for a personalized user experience.

## Cryptocurrency Market Analysis and Prediction

*Python, TensorFlow, LSTM, RNN, Pandas, NumPy*

- Built a deep learning model for cryptocurrency price forecasting.
- Performed data preprocessing, feature engineering, and exploratory analysis.
- Validated pipeline outputs through iterative testing of data transformations and model predictions.

## Gesture-Controlled PowerPoint Presentation System

*Python, OpenCV, Computer Vision*

- Developed a touch-free presentation control system using hand gestures.
- Implemented real-time hand gesture detection with OpenCV.

## Unified Web Portal for Government Schemes

*HTML, CSS, JavaScript, Django*

- Developed a centralized information portal for government welfare schemes.
  - Built search functionality and responsive user interfaces.
- 

# Certifications

- AWS Certified Cloud Practitioner (CLF-C02) – Udemy
  - AI/ML for Geodata Analysis – IIRS, ISRO
  - Artificial Intelligence Fundamentals – IBM SkillsBuild
  - Machine Learning using Python – Infosys Springboard
  - Power BI for Business Professionals – Infosys Springboard
  - Data Visualization with Tableau – Infosys Springboard
  - Google Android Developer Virtual Internship
- 

# Additional Information

- Strong problem-solving and analytical skills; comfortable taking action and decisions under uncertainty.
- Familiar with Git, CI/CD concepts, and Agile workflows.
- Effective communicator and collaborative team player.
- Actively developing knowledge of DCS/SCADA systems, virtualization, and additional scripting tools (PowerShell, VB, Batch).
- Languages: English, Hindi, Telugu.
