Location: Kadapa, Andhra Pradesh

Professional Summary

B.Tech (Computer Science Engineering – Artificial Intelligence & Machine Learning) graduate with hands-on experience in Java, Python, SQL, React.js, Django, and REST APIs. Developed full-stack web applications, machine learning solutions, and computer vision projects. AWS Cloud Practitioner certified with strong foundations in Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), data structures, and problem solving.

Core Skills

- **Programming Languages:** Java, Python, SQL, JavaScript
- **Frameworks & Technologies:** React.js, React Native, Expo, Django, REST APIs, HTML5, CSS3
- **Core Concepts:** OOP, Data Structures, SDLC
- **Databases:** SQL, Database Design
- **Cloud:** AWS Cloud Practitioner (CLF-C02)
- **Tools:** Git, TensorFlow, Keras, Scikit-learn, OpenCV, VS Code

Project Highlights

- **Online Shopping Mart** – Full-stack web application using Java, Django, React.js, SQL, and REST APIs.
 - **Cryptocurrency Market Prediction** – Deep learning-based forecasting system using Python, TensorFlow, LSTM, and RNN.
 - **Gesture-Controlled Presentation System** – Real-time hand gesture recognition system using OpenCV and Computer Vision.
 - **Government Schemes Web Portal** – Centralized portal developed using Django, HTML, CSS, and JavaScript.
 - **Personal Wellness Mobile App** – Feature-rich React Native (Expo) app with journaling, music player, mood check-ins, memories, and themed persona screens.
-

Education

Bachelor of Technology (B.Tech)

2025

Computer Science and Engineering (Artificial Intelligence & Machine Learning)

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology, Chennai

Technical Projects

Online Shopping Mart – Full Stack Web Application

Java, Django, React.js, SQL, REST APIs

- Designed and developed a full-stack e-commerce web application.
- Implemented backend business logic and database integration.
- Developed RESTful APIs and user authentication features.
- Applied OOP principles to build a scalable and maintainable code architecture.

Cryptocurrency Market Analysis and Prediction

Python, TensorFlow, LSTM, RNN, Pandas, NumPy

- Built a deep learning model for cryptocurrency price forecasting.
- Performed data preprocessing, feature engineering, and exploratory analysis.

- Implemented time-series prediction pipelines using LSTM and RNN architectures.

Gesture-Controlled PowerPoint Presentation System

Python, OpenCV, Computer Vision

- Developed a touch-free presentation control system using hand gestures.
- Implemented real-time hand gesture detection with OpenCV.

Unified Web Portal for Government Schemes

HTML, CSS, JavaScript, Django

- Developed a centralized information portal for government welfare schemes.
- Built search functionality and responsive user interfaces.

Personal Wellness Mobile App

React Native, Expo, JavaScript, AsyncStorage, Expo AV

- Built a multi-screen mobile application using React Native and Expo Go featuring journaling, daily check-ins, mood tracking, and memories.
- Implemented a fully functional music player with playback controls using Expo AV.
- Designed themed persona screens (Soul, Nature, Magic, ForYou, Explore) for personalized user experience.
- Integrated AsyncStorage for persistent local data storage across sessions.
- Developed 12+ screens including WelcomeScreen, JournalScreen, BirthdayScreen, and MusicScreen with clean navigation using React Navigation.

Certifications

- AWS Certified Cloud Practitioner (CLF-C02) – Udemy
- AI/ML for Geodata Analysis – IIRS, ISRO
- Artificial Intelligence Fundamentals – IBM SkillsBuild
- Machine Learning using Python – Infosys Springboard
- Power BI for Business Professionals – Infosys Springboard
- Data Visualization with Tableau – Infosys Springboard
- Google Android Developer Virtual Internship

Additional Information

- Strong problem-solving and analytical skills.
- Familiar with Git, CI/CD concepts, and Agile workflows.
- Effective communicator and team collaborator.
- Languages: English, Hindi, Telugu.
